

Features

- * With standard chassis design and 2U aluminum alloy panel; personalized handle design, good appearance and practical.
- * 16 power outputs, each outputs AC230V (10A).
- * With electronic lock switch, 2 modes: manual and automatically.
- * 16 power sockets connect or disconnects in turn. The time between the two ways is 1S
- * The full capacity of power socket gets 6KVA.
- * 1 input interface with 24V fire signal, 1 signal output triggered by fire short circuit emergency.
- * 1 short circuit triggered signal input. 1 expandable output triggered by short circuit, It can connect a timer, intelligent machine to realize automatically control.
- * Concise LED working status display indicators.

Specifications

Model	T-6216
Power Supply	~110V/60Hz or ~230V/50Hz
Power Consum	20W
Dimension	484x303x88mm
Weight	5.6Kg
