

Features

- * Ambient noise sensor for ambient noise controller
- * The system support both serial connection parallel connection
- * The system sensor capacity is 16 units
- * Max 16 units sensor can be connected to four channels or one channel
- * End-user self defined sampling frequency period
- * Collect the surrounding ambient level and feedback to controller
- * Full digital sensor solution for more accurate detection
- * Cascaded connection by line in and line out
- * High & low filter frequency adjustable
- * Max communication distance is 3kms.
- * Communication cable through universal speaker cable

Specifications

Model	T-6251C
Microphone Type	Condenser microphone
Communication Model	Bus line
Noise Frequency filter	4
Output level	1V/600Ω
Frequency response	80-18KHz(+1/-3dB)
THD	≤1%
Power consumption	4W
Communication distance	3KM
Power supply	~230V/50Hz
Dimension	245x155mm
Weight	1kg

Connections
